

# Yash Mehta

## Software Engineer

Full Stack Developer with experience building scalable web applications and enterprise solutions. Skilled in designing APIs, developing responsive user interfaces, and optimizing backend performance. Experienced in leveraging AI-assisted development tools, automation, and data-driven solutions to improve productivity and deliver reliable software systems through effective team collaboration.

## WORK EXPERIENCE

### Full Stack Engineer

Spectra Technovision India Pvt. Ltd.

07/2024 – present

*Achievements/Task:*

- Contributing to the development of enterprise **biometric software solutions** used for identity verification and operational automation across multiple business.
- Designed and developed **scalable full-stack applications** using **Angular, Node.js, Express.js, and MySQL**, ensuring secure and efficient data handling.
- Developed and maintained **RESTful APIs** for dashboards, analytics, and operational reporting modules, supporting **sales, support, and enterprise workflows**.
- **Led the design and development of the Project Management module** within the organization's CRM platform, including **database schema design, back-end architecture, and API development**.
- Acted as **Lead Developer**, coordinating development activities, performing **code reviews**, mentoring developers, and ensuring seamless collaboration between **front-end and back-end teams**.
- Diagnosed and resolved **production-level issues** in **RMA-Management and operational modules**, improving **system reliability, application stability, and user experience**.
- Designed and implemented the **Visit Management module**, enabling **real-time field staff tracking, reporting, and synchronization with back-end systems**.
- Worked in an **AI-assisted development environment**, leveraging modern AI tools to accelerate development, automate workflows, and improve engineering productivity.
- Conducted **R&D on AI-driven capabilities**, including **Speech-to-Text integration and AI automation agents**, to enhance operational efficiency and intelligent system features.
- Improved **back-end performance and scalability** by optimizing database queries and API logic, **significantly reducing API response time** and improving system throughput.
- Led the **migration and upgrade of the front-end framework from Angular 14 to Angular 19**, improving performance, maintainability, and modern framework compatibility.

### Jr. Full Stack Developer

Accomation.io

12/2023 – 05/2024

*Achievements/Task:*

- As a Full Stack Developer, worked on product **Pre-accounting software**, using technologies such as Angular, Nest JS. and TypeORM.
- Designed and implemented dynamic **UI components with Angular** and backend services using **NestJS**, integrated with **MySQL** for seamless data management.
- Established **real-time data communication with Tally ERP 9** using NestJS APIs.
- Provided **innovative and efficient solutions** to improve accounting operations through technology.
- Continuously enhanced technical proficiency in **Angular, NestJS, and TypeScript** through ongoing learning and implementation.

### Jr. Full Stack Developer

F(x) Data lab pvt. Ltd.

04/2022 – 10/2023

**TMP (The Market People)**

*Achievements/Task:*

Technologies: **Java, Strutsv1.0, Hibernate, JavaScript, JSP, JQuery, PostgreSQL, MVC.**

- Working on **Java full stack development** for the project based on market that is running in UK.
- My role is **Implementing new feature, bug fixing** and working as per **client requirements**. Also working on new approach and Implement it in UI, code and Database level.
- Improved skills in **debugging, analyzing legacy code**, and maintaining high code quality.
- Deployed builds on **AWS**, created CSV exports for data management, and ensured system consistency.

### GWR(Genius World Record)

*Achievements/Task:*

- Technologies: **Fast API, React, MySQL and AWS**
- Developed a web application for a world record event (maximum people brushing simultaneously).
- Implemented **video recording and upload to AWS S3**, and collaborated with the ML team for activity recognition.

- Created a **responsive React UI** and developed **REST-APIs** using FastAPI and MySQL.

### F(x) website (company's website)

*Achievements/Task:*

- Technologies: **React, Redux, Laravel, MySQL.**
- Converted **Figma designs** into **responsive React components**, and built APIs for new functionalities using **Laravel.**
- Redesigned and implemented new flows for **Careers, Hire Developer**, and **Profile** modules.
- Created end-to-end functionality with seamless **UI-API integration** and **dynamic content management.**

## Software Developer Intern

Resilient Hex

05/2021 – 12/2021

*Achievements/Task:*

- Began professional journey in **web development**, learning **HTML, CSS, JavaScript**, and **React.**
- Explored **React Hooks, React Graphs**, and routing concepts through hands-on practice.
- Built the **Expense Management System** project using React with data visualization and routing logic.
- Contributed to design and UI improvements for live web applications, including **4AM Business.**

## EDUCATION

### B.E. in Information Technology

Gujarat Technical University

2021

Ahmedabad, Gujarat – **8.51 CGPA**

### Intermediate (10+2)

Gujarat Secondary and Higher Secondary Education Board

2017

Ahmedabad, Gujarat - **60%**

### High School (10th)

Gujarat Secondary and Higher Secondary Education Board

2015

Ahmedabad, Gujarat - **70%**

## PERSONAL PROJECT

### Fractional Calculation and Graph Representation

**Tool** (Technology: JavaScript/ chart.js )

- Designed and developed a program to **perform and automate fractional calculations** and display **graphical representations** of iterative results up to  $N$  iterations.
- Implemented logic for handling fractional arithmetic, convergence checks, and visual output to analyze iteration trends.

**College Portal** (Technology: Java, Spring Boot, ReactJS and MySQL)

- Developing a web application to full-fill the gap between the Students and Alumni. This web application is based on Social Media.
- This portal made with ReactJS as front-end (client side) and as a back-end used java framework spring and in spring used MVC

structure. In spring we made some APIs. As a database we used MySQL to CRUD operation on data.

- On this portal any person can create post(like any social media), comment and report. Also create account and update.

### Tic Tac Toe(Technology: JavaScript)

- Build the game tic tac toe in JavaScript. Implement mini-max algorithm, This algorithm used to choose best move and UI created with ReactJS.

## SKILLS

- **Front-end Development:** Angular, React.js, TypeScript, JavaScript, JSP, HTML5, CSS3
- **Back-End Development:** Node.js, Express.js, NestJS, Python – FastAPI, Java – Struts
- **Database Management:** MySQL, PostgreSQL
- **Cloud & DevOps:** AWS EC2, AWS S3, Linux/Ubuntu, Deployment & Build Management, Version Control (Git)
- **AI & Modern Development:** AI-assisted development tools, Speech-to-Text Integration, AI Agents.

## CERTIFICATES & ACHIEVEMENTS

- Won the 3<sup>rd</sup> prize at State level XITIJ-2017 in Skit .
- Participated in the three day national level workshop on “AWS CLOUD” by GUJCOST (19<sup>th</sup> – 21<sup>st</sup> September, 2019) .
- Participated in an exclusive webinar of “How to stay safe online?” on national Technology Day(May 11, 2020) .
- Participated in an webinar of “HTML and CSS” on (June 21, 2020) .
- Participated in webinar of “Ethical Hacking” on(August 10, 2020) .

## SOFT SKILLS

- Problem Solving & Debugging
- Cross-Functional Team Collaboration
- Requirement Analysis & Technical solution
- Strong Communication & Mentorship
- Continuous Learning & R&D mindset

## HOBBIES

- Traveling and exploring heritage and cultural sites.
- Cooking and solving logical/mathematical problems.
- Listening to and performing **Lok-sahitya** and **Dayro.**
- Playing musical instruments – especially **Banjo.**
- Like to play **Cricket, Badminton, and Chess.**

## LANGUAGES

- Gujarati (Native)
- English (fluent)
- Hindi (fluent)
